

THE COMPLETE SYSTEM TO ELIMINATE DOOR DAMAGE

Our Door Defender™ Protection System has a rugged outdoor-grade polyethylene construction featuring a patented bumper profile that acts as a spring to absorb door impacts.

Door Defender™ is entirely waterproof and has been impact-tested to meet or exceed 10+ year field usage in conditions as harsh as -40° F and +130° F.

The system includes a “one size fits all” side post guard that stretches to cover autorack structural elements to provide full protection for automobiles during loading and unloading, as well as Holland’s trusted nylon buttons with triple engaging lips.

Patent Number: 10,407,083

- Requires no adhesive
- Tear-resistant button slots
- Easy installation
- Nesting design – compact shipping
